

# Let Our Earth Breathe!

A message for all Duty Bearers  
(adults that means you).

Valewood Primary is a Rights Respecting School and we need your help. All children have the right to be free from harm and have a healthy environment that has the best interests of the child at the heart of every decision. But are we getting these rights?

In Year 1 we have been finding out about how the ice is melting in the Arctic because of Global Warming. We have also been very shocked to see how untidy our local area is, especially how much rubbish is left including lots of disposable face masks. We have seen them left in shopping trolleys, dropped onto floor, on the beach, in parks and even in the sea!

We know that wearing a face mask is very important in the fight against Coronavirus but so is the fight against pollution and making our world a safe, healthy place for all.

## So, how can you help?

All we are asking you to do is use a reusable face mask and help us to let our earth breathe!
