

Year 1 Science Knowledge Organiser – Seasons

Curriculum Objectives

I can observe changes from one season to the next.

I can describe weather associated with seasons.

I can describe how day length varies from one season to the next.

Selected Vocabulary and Key Knowledge

Seasons	There are 4 seasons each year: Autumn, winter, spring and summer.
Autumn	The weather begins to get colder. Leaves start to fall from the trees. Days are shorter; nights are longer.
Winter	The weather is much colder. Many trees have bare branches as leaves have fallen off. Days are the shortest in the year; nights are the longest.
Spring	The weather starts to get warmer. Leaves begin to grow on trees, some have blossom. Daytimes start to get longer.
Summer	The weather gets hotter. The trees are full of leaves. Days are long; nights are short.
Weather	This includes the temperature outside, the wind direction and rain, cloud, snow and sun.
Daylight	When it is light outside. The amount of daylight changes with each season.

Can you name the four seasons?

Which season has the longest day?

How does the weather change throughout the year?

Which season has the shortest day?
