

Year 1 Science Knowledge Organiser – Plants

Selected Vocabulary and Definitions

Wild Plants	A wild plant seed grows where it falls. It doesn't need to be planted or cared for as it grows.
Garden Plants	Garden plants are plants that people choose to grow in their gardens.
Weeds	Weeds are wild plants that grow in places where people don't want them.
Deciduous	A deciduous tree loses its leaves each year.
Evergreen	An evergreen tree keeps its green leaves all year round, even in the winter.

Curriculum Objectives

- I can identify and name a variety of common wild and garden plants.
- I can identify and name common deciduous and evergreen trees.
- I can identify and describe the basic structure of common flowering plants.

Selected Vocabulary and Definitions

Roots	Roots take in water and nutrients from the soil.
Stem	The stem holds the plant up and carries the water and nutrients from the roots to the leaves and flowers.
