

# Recycle to save our planet!

## **A message to all our Duty Bearers** *(Including you, our parents and carers):*

Valewood Primary is a Rights Respecting School and we need your help. All children have the right to be free from harm and have a healthy environment, that has the best interests of the child at the heart of every decision. But are we getting these rights?

In Year 5, we have been learning about the impact disposed plastic has on our local environment and the importance of recycling.

Through our Science work, we have learnt that plastic is a very useful material to use; however, we also understand that we need to keep a safe and healthy

### **So, how can you help?**

All we are asking you to do is to recycle plastic correctly so that it can be reused, which will help to avoid damaging our local environment.
